Dr. C. G. Kurland  
Department of Molecular Biology  
Biomedical Research Center  
Uppsala University  
Box 590  
Uppsala, S751 24 SWEDEN

Dear Dr. Kurland:

I have just gotten round to reading your review on translational infidelity, in the Annual Review of Genetics and I want to thank you for writing it. I enjoyed it for many reasons. It evoked old memories (see enclosures); and it bears on some of my current work on mutagenesis in stressed *E. coli*. If it is not too much trouble, could you send me a bundle of your recent reprints?

Do you know of any relationship between SOS induction (eventually error-prone DNA repair) and alterations in translational fidelity?

Yours sincerely,  
  
Joshua Lederberg
